## **DETAILED ACTION**

### ***Introduction***

1. Applicants' amendments and remarks filed on 5/9/2007 have been entered. Claims 1, 9, and 17 have been amended. Claims 1, 3, 4, 6, 8, 9, 11, 12, 14, 16, 17, 19, 20, 22 and 24 are active.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Since the newly submitted amendment appears to be insufficient to correct the new matter issue raised in prior Office action, the rejections over Weng and Ishiwata references remain to be withdrawn from the present Office action, and to be reinstated, if appropriate, once the new matter issue is resolved.

### ***Claim Rejections - 35 USC § 112***

4. Claims 1, 3, 4, 6, 8, 9, 11, 12, 14, 16, 17, 19, 20, 22 and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In independent claims 1, 9 and 17, lines 3-4 of each claim, the amended recitation "a tape comprising a flexible film material, the tape having a coefficient of thermal expansion substantially similar to the semiconductor device and antistatic properties" appears to have the

Art Unit: 1771

same new matter added in an amendment filed 9/26/2005, as pointed in the prior Office action mailed 2/9/2007. More particularly, since the specification merely discloses that “marking tape 1 is formed of a material which has a similar coefficient of thermal expansion to that of the semiconductor die” [Figs. 4-5; paragraphs 0015 and 0047], and clearly distinguishes the flexible film (carrier tape 4) as a separate component disposed over marking tape 1 [paragraphs 0015, 0034, 0041-0043] in a laser-markable structure, and lacks any description regarding the coefficient of thermal expansion of the flexible film (carrier tape), the recited limitation is deemed to be new matter.

#### ***Response to Argument***

5. Applicants state that claimed invention has been amended to comply with the provisions of 35 U.S.C. 112. However, a careful review of the amendment shows that the newly amended claims still recite a limitation which is not found in the original specification, and therefore appears to be new matter. Specifically, the amended claims recite a tape having a coefficient of thermal expansion substantially similar to the semiconductor device, and the tape comprises a flexible film material. However, the original specification discloses a marking tape 1 having a similar coefficient of thermal expansion to that of the semiconductor die, and the marking tape 1 does not comprise the flexible film (carrier tape 4). While the flexible film is combinable with the marking tape 1, and used together, nonetheless they are separate component and the specification lacks a description that the combination has the thermal property as claimed.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

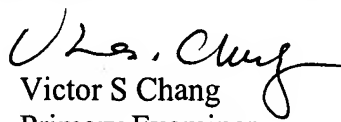

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
